

Introduction to Virtual/Augmented Reality and Telepresence

Assignment 1

Topic: ROLL-A-BALL TUTORIAL

Unity 3D Version

Create a simple rolling ball game that teaches you many principles of working with Unity.

In your first foray into Unity development, create a simple rolling ball game that teaches you many principles of working with Game Objects, Components, Prefabs, Physics, and Scripting. No asset download is required. Follow the tutorial instructions provided at <https://learn.unity.com/course/roll-a-ball>

In addition to the tutorial specifications, I would like you to add extras such as:

- Texturing the balls with various images
- Adding basic shaders to the game
- Improving user interface

The making will be based on the following:

- The functionality of the game is 70%
- Additional features: Texture 10% Shaders 10% New interface 10%

Send the working game (as a video capture) and a link to the Unity 3D project at VRARMM806.2026@gmail.com on October 9.
